**Panel 3: *Independent Administrative Appeals and the Promotion of Integrity and Fairness in the Tax System.*** An effective independent administrative appeals function promotes taxpayer trust while resolving disputes that are fair to the government and taxpayers, without the need for litigation. However, achieving true independence within tax agencies can be challenging, and statutes and procedures can create barriers, thereby limiting access to obtaining administrative appellate review. This panel will hear from tax administrators, ombuds, and researchers about the challenges in establishing new dispute resolution offices and protecting the independence of existing ones, particularly in Africa.

These initiatives not only raise privacy concerns but also concerns about the digital divide and whether whole populations of taxpayers will be able to engage with the tax agency or have to rely on intermediaries. This panel will discuss the benefits and challenges of tax digitalization, including taxpayer and human rights concerns.

Statutory periods of limitation and rigid collection procedures can extend debt indefinitely and fail to take into account that specific facts and circumstances that prevent the taxpayer from complying with complex tax rules or paying tax.
